Mr. Shawn McDowell  
WCI – Nebraska  
2101 Judson  
Lincoln, NE 68521

Dear Mr. McDowell,

This letter shall serve notice that the landfill will be increasing our rates 5% effective January 1, 2017. The adjustment is a result of many landfills including G&P seeing major increases in environmental monitoring costs. The New Source Performance Standard is affecting our landfill causing increase in capital and monitoring costs. In order to keep up with these increasing costs, and to continue providing you with the same great service, we will be adjusting our rate to help with a part of these increases.

This increase will only affect the following waste types on the following accounts:

	<u>New Rate</u>
MSW (municipal solid waste)	\$41.50/ton

We are looking forward to your continuing patronage of G&P Development Landfill. If you have any questions or concerns, please feel free to contact me at (402) 367-4662.

Sincerely,

Kelly Danielson  
District Manager
